CHOOSE HIGH PERFO RMANCE *timber!*

For builders, self-builders and homeowners alike, there is a growing determination to choose timber windows and doors - an inherently beautiful material that adds value and desirability to every build.

But timber is not just beautiful. Today's technologies ensure that multi-layered, engineered timber windows and doors are immensely long-lasting, secure and insulated. Any risk of warping or twisting has been eliminated.

Dale Joinery combines British design with cutting-edge Scandinavian timber technology to produce windows and doors of the very highest quality - backed by cast-iron guarantees for complete peace of mind.

Timber has a charm, character and performance that man-made alternatives cannot match, whilst also being an entirely sustainable choice - an increasingly important factor for many homeowners.

We only use European Redwood from sustainably managed plantations in Northern Europe - a timber whose performance has been provenover many centuries. As part of our environmental commitment we never use tropical hardwoods - whilst our full environmental policy, objectives, targets and records are available on request.

Multi-layered, engineered timber is formed through finger jointing - using short pieces of perfect timber, mechanically bonded together to form longer lengths. The opposing grains then even out any natural moisture movement, resulting in an immensely strong and stable timber, perfect for windows and doors.

This cutting-edge technology is also key to all Dale Joinery products achieving high levels of energy efficiency. Every casement window is rigorously tested to BS6375-1:2009 for weather tightness and air permeability - meeting or exceeding the criteria for this exacting standard.

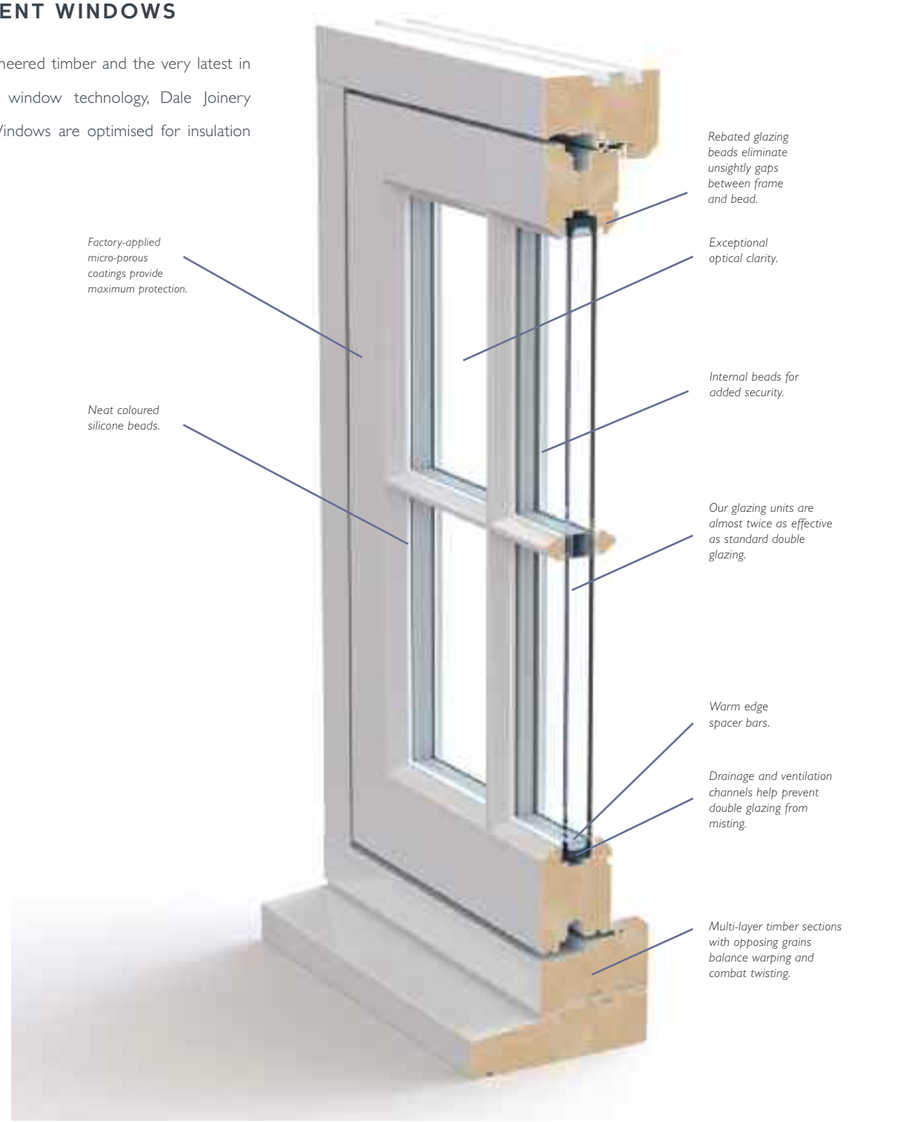
With high performance and proven sustainability, Dale Joinery windows and doors can make a huge difference to our customer's homes - not simply in the way they look but to the everyday experience of living with them. Warmth, security and ease of use, combined with enhanced home values make a compelling case for this most authentic of building materials.

Whatever kind of home project you are involved with - whether improvement or an entirely new build - Dale Joinery windows and doors can make a real and lasting difference. We hope that this brochure inspires you to make the natural choice for your home.

LASTING PERFORMANCE & PROVEN *sustainability*

DALE JOINERY CASEMENT WINDOWS

Utilising engineered timber and the very latest in Scandinavian window technology, Dale Joinery Casement Windows are optimised for insulation and longevity.



DALE JOINERY SASH WINDOWS

A classic design updated in every way, Dale Joinery Sash Windows utilise engineered timber to provide exceptional levels of insulation and longevity..

CASEMENT WINDOWS

Dale Joinery casement windows are ideally suited to traditionally designed new builds and the refurbishment of character homes, particularly in conservation areas

Fungal & Insect	Sealed Unit	Hardware	Workmanship	Paint	Stain

CASEMENT WINDOWS

Our most popular range, Dale Joinery casement windows include Flush and Stormproof options, the latter ideal for homes in more exposed positions. Whichever you choose both offer exceptional levels of insulation.

Dale Joinery Flush Casements have sashes that close flush into the frame whilst our Stormproof Casements have sashes that close overlapping the frame, providing additional weather protection. Slim glazing bars in a wide variety of configurations may be added as required to enhance overall appearance.

With advanced draught sealing, highly efficient double glazing, internal beading and robust, multi-point locking systems, Dale Joinery Casement Windows deliver high performance and an authentic appearance.

With a wide range of styles and over 200 colours available, including the option to have different colours inside and outside, together with a complementary range of entrance doors and French doors, you can be certain to find the perfect look for your home.

SASH WINDOWS

Well-proportioned box sashes add prestige, value and style. Dale Joinery's sash windows also deliver 21st century standards of insulation, weathering and performance, together with a smoothness of operation our predecessors would envy..

**Marginal Bar **

Hung on neatly concealed springs, or traditional weights and sash cords, the choice of style can be tailored to suit the property. The use of energy efficient glazing helps to lock in the heat, whilst careful attention to draught stripping has eliminated rattles and draughts.

Our system also allows you to tailor your sash windows to the precise requirements of your project, with slim glazing bars available in a wide variety of configurations.

Dale Joinery's sash windows faithfully emulate the lines of the originals commonly found in Georgian & Victorian homes, but bring 21st century standards of insulation, weathering & performance

Dale Joinery entrance doors are made-to-order in an extensive range of styles and may be enhanced with feature glass, including designs based on original Victorian glazing motifs.

A wide range of traditional shades are available, together with more subtle colours such as Blue Grey, Chrome Green and Oyster White. Multiple colours can also be combined on the same door, enabling the inside face to match your internal decor.

A selection of ironmongery can be added, including spy holes, letter-plates, knockers and security chains, whilst all doors are hung on robust hinges. Your security is assured by multi-point locking mechanisms, whilst we are also able to provide door sets that comply with Document M Mobility Access regulations.

Decorative glazing options

Flower | Bevel | Plant | Classic

Our colour options

White painted windows look traditional and smart but are not the only option - householders may be surprised to learn that only 40% of the windows we sell are white. Dale products are available in hundreds of different shades - from vibrant hues to subtle creams and greys. Multiple colours can also be combined on one item, enabling you to finish the internal frame to match your room decor. The reproduction of the colour palette shown on the opposite page is for illustrative purposes only.

Popular colour options

These samples have been produced to represent the colour choices available and are as close as accurately possible. However, because wood is a natural material the surface texture and colour shade may vary.

RAL colours

In addition to our most popular colour palette, our products are available in any colour from the RAL Classic range providing a further 210 shades for clients to choose from.

Stain options

Due to the natural and attractive variance of the timber in colour and texture, stain finishes can vary from one piece of timber to another. Stain finishes shown are indicative of the shades available, but we are unable to guarantee a complete colour match either in installations carried out at the same time or in staged time installations.

COLOUR CHOICES

TECHNICAL INFORMATION

PRODUCT RANGE

Stormproof windows, flush casement windows, sash windows, single entrance doors, double doors, bi-fold doors and patio doors.

GENERAL INFORMATION

All products are made-to-measure, supplied fully factory glazed and finished. Manufactured from engineered, warp resistant multi-layered timber for strength and stability.

LEAD TIMES

Competitive, consistent and guaranteed lead times.

TIMBER SPECIES

Engineered European Redwood.

PROFILES

Chamfered

FINISH

Single or dual colour options available using modern, microporous water based long life paints and stains.

GLAZING OPTIONS

We offer a host of different options, including astragal bars/squares, rectangular leaded lights and diamond leaded lights.

GLASS

24mm (4/16/4) double glazed units as standard with soft-coat energy saving glass and argon gas filled sealed units. Choice of clear, patterned or sandblasted glass, which may be annealed, toughened or laminated. Self cleaning and noise-reducing glasses available on request.

LOCKS

Modern, high security multi point locking mechanisms to all windows and doors. Secure multi-point locks to windows with night vent position and key lockable handles.

VENTILATION

Trickle vents may be fitted to head of frame as needed.

HANDLES

Standard – Suited door and window handles with matching letter plates in polished chrome, satin chrome, white, black, bright bronze and brass. Period style window handle - Black finished monkey tail handle. Windows may be supplied without handles on request.

HINGES

All opening windows hung on friction hinges - Standard, easy-clean and restrictor options available.

HEAD DRIPS

Factory fitted or supplied loose. Multiple options available.

ADD-ONS

Factory fitted or supplied loose. Multiple options available.

CILLS

Factory fitted or supplied loose. Multiple options available.

SHAPES

Arches, circles, raked frames and swept heads within sashes available.

ANCILLARIES

A selection of trim and window boards are available pre-finished to complement the range.

We reserve the right to make changes to the product specification as technical developments dictate and without prior notice.

Fungal & Insect	Sealed Unit	Hardware	Workmanship	Paint	Stain
30 YEARS GUARANTEE	10 YEARS GUARANTEE	10 YEARS GUARANTEE	10 YEARS GUARANTEE	8 YEARS GUARANTEE	5 YEARS GUARANTEE

Our fungal & insect guarantee is subject to fully maintained protective coating, hardware is under manufacturers warranty and paint and stain are subject to climate conditions and product care. Terms and conditions apply. Written details are available on request.

PRODUCT CARE

HANDLING

Always ensure that there is adequate labour or the appropriate mechanical lifting gear available on site to safely offload and transport the product on site to avoid causing any damage.

SITE STORAGE

- Long term storage of our products on site is not recommended.
- Timber products should be stored in a clean dry area and kept away from other site activities to avoid damage to the timber, glass, ironmongery or factory finishes.
- Failure to store, handle and maintain our timber products appropriately could invalidate your guarantees.
- Always place factory finished and glazed products on bearers and store vertically.
- Any protective wrapping on the product should be left in place until the product is required for installation and care must be taken when removing any protective wrapping.
- Sashes must always be kept in the closed position during the building/installation process and any on site glazing should also be carried out with the sashes closed.
- Allow sufficient spacing between each product to prevent handle or cill damage, for ease of handling and to maintain good air circulation around the products.
- Always avoid storing products in extremes of light or temperature or in unventilated rooms or where wet trades are taking place.

EXHIBITION, SHOWROOM & TRAINING FACILITY

National Self Build & Renovation Centre,

Swindon SN5 8UB - J16 M4

Situated in the heart of the National Self Build & Renovation Centre, our facility incorporates a training hub for Dale Joinery and also displays of the complete range of Dale windows and doors.

This unique facility gives you the opportunity to meet the Dale team and see the quality of Dale's performance timber windows and doors – we welcome visitors at any time, so please drop by at your convenience.
