Dear Becky,

Thank you for your email regarding the above application. I apologise if the reference to complimentary makes things unclear. The purpose of the storage units is for farm diversification, to allow for additional income into the farm business. The containers are considered to offer an opportunity to provide extra revenue for the farm without interfering with the overall running of the agricultural business.

The farm is often approached regarding providing storage facilities. The existing farm buildings are not easily adaptable to provide secure storage and the proposed shipping containers are considered to offer a suitable option. They will be sited within the existing farmyard, viewed in association with the existing farmbuildings. They are also located to the front of the yard, away from the main group of buildings and the principial movement and flow of farm traffic.

I hope this clarifies the purpose of the storage application but please do contact should you wish to discuss any of the above.

Kind regards

Julie Chandler MA MRTPI
