

Notes:

Planting:
Either cultivate a trench to 300 mm deep and 1000 mm wide or slit plant hedge plants and pit plant trees.

Protective Fence: To be agreed with landowner but provisionally sheep netting with two strands of barbed wire (or plain wire if public access) on wooden posts.

Hedgerow Species Distribution:
Double row of hedging at 400 mm between rows and 500 mm centre within each row.
Calculation of numbers based on 4 plants per linear metre for 1.5 m overall width.

Shrub Species:
Species to be distributed in groups of 3 to 9 spaced irregularly along the entire length of the hedge.
The repetition of the groups should be random and not follow any regular pattern.

Tree species:
Standard trees shall be distributed along the length of the hedge and paced approximately 10 m apart.
