Your Job Ref:

I have included the 23% discount off the trees which we offer as the cumulative tree value is over £5,000 and the trees are delivered in July 2023.

Delivery would be in an (HGV) rigid truck. Offloading of the trees with a manitou fork lift - requires 3m min. width, no steps or tight turns.

WARRANTY:
Unfortunately, we are unable to offer our one-year establishment warranty on trees we do not plant and on those that are put into containers. However, we do guarantee to supply the trees true to name and in good health.

Delivery only - Our standard delivery charge is for delivery to kerb by one person, the driver. If the tree is in a pot larger than 80 litre or you need the tree taken beyond the kerb it will require an additional charge for a second person or you providing a strong, physically able person to help. It does not include ferrying trees from any distance, which will significantly increase the time on site and therefore the delivery charge. Offloading equipment for large trees or to get trees through or over obstacles can be provided at an additional fee

Delivery/Planting Instructions:

Customer has manitou on site, MT625 with forks and bucket only.
Double gate entrance in to offload area.
For delivery use postcode SP1 2TG as you will be entering at the back of the property.

Call either of the below and you will be directed in to the site.
