Location

5 Milford Park is located between Milford Park culdesac and Miford Mill Road. The rear garden faces Milford Mill Road and the home is characterized by it's clay hannging tiles on the first floor. The property can be viewed from both roads. The front of the property faces Milford Park and the rear faces Milford Mill Road.

Description

The homeowners wish to replace the rear fence for a number of reasons which they believe will support their quality of life and also be benificial for the public using Milford Mill Road. The existing fence is approximately 1.75m and the replacement would be 2.4m. This increase in height would help with privacy, as many vehicles can look over the fence into the lounge, especially trucks and vans. The neighbouring properties have used landscaping with hedges and trees to create privacy at a considerable height. Considering the proximity between the property and the road, drivers may be distracted by looking into the home instead of focusing on the road. This may be increased in the winter months when it's dark outside and the lights are on inside. Another concern the owners have is that they have noticed some of the fence has started to lean in the direction of Milford Mill Road and wish to replace the fence with something more stubstantial to prevent this in the future. Another factor the owners are considering is replacing the fence with one that is more soundproof along with the exta height, preventing motoring polution from affecting the garden. With this, the fence post will be supported by concrete to ensure longevity and safety.

Overall

The fence will be 0.65m taller than the orginal, and apart from height, the materials and colour will be kept simular. The only variations would be the addtion of concrete posts or metal posts if required to ensure longevity and safety.
