Landscaping & Planting plan

Shady side of garden to be planted with ferns and log piles to encourage and shelter bugs and wildlife. Lawn to blend into shrub bed.

Proposed species: Various fern and shade loving shrubs, Max spread 50cm, height up to 1m.

All bed planting along the fences will be indigenous varieties of hardy perennials, pollinator friendly varieties will be selected when possible. Beds will be raised near to the house then will phase into lower beds with edging then at grass level to blend into the meadow. Raised beds will be constructed from timber and reclaimed materials.

Proposed species:

Buddleia-Maximum spread 1m, height 3m (will be maintained)
Foxgloves-Maximum spread 50cm, height 2m
Various species of Daisy, maximum spread 1m, height,1m
Cranesbill, Gold Dust, Tickseed
Maximum expected spread for all varieties Approx 1m, height 1m.
Geranium, spread 1m, height 40cm,

Meadow at the end of the garden: the planting of meadow flowers and grasses adjacent to the estate fencing at the rear of the garden will create the illusion of garden into field blending, whilst encouraging wildlife into the garden. Max height 50cm, spread 1-2meters. Species of meadow grass include Cowslip, Birdsfoot Trefoil, Lady's Bedstraw, Rough Hawkbit, Red Clover, Oxeye Daisy, Yellow Rattle, Meadow Buttercup. Followed through the summer and into Autumn with Selfheal, Sorrel, Tufted Vetch, Knapweed, Toadflax, Musk Mallow and Ragged Robin. Hard landscaping: A decking area of Approx 2x4metres as located on drawing. **Driveway**: grey gravel to tie with grey window frames and provide additional security, planting of shrubs and wild flower seeds such as California poppies to soften the edges. Path leading to stair to Front door.
