Design and Access & Heritage Statement

This listing description is principally to aid identification. While list descriptions will include mention of those features which led English Heritage to recommend listing, they are not intended to provide a comprehensive or exclusive record of all the features of importance, and the amount of information given in descriptions varies considerably. Absence from the list description of any reference to a feature (whether external or internal) does not, therefore, indicate that it is not of interest or that it can be removed or altered without consent. Where there is doubt, the advice of the local planning authority should be sought.

Statement –

When selecting the signage for this listed building, consideration has been given to its historical nature in terms of the sizing and design of the new signage.

The name of the pub i.e. “ANCHOR & HOPE” house name on the front elevation be a like for like, signwriting. With the colour of the amenity text either side now matching the house name to give the building a cleaner finish.

The amenity board will replace the existing signage like for like in material. The boards are simple so as not to detract from the features of the building. The colour chosen have been done so to complement the newly proposed building colour.

Finally the lighting, the swan neck lights will be replaced with a new, neater looking trough light to illuminate the house name without projecting as far from the building, with the flood lights being replaced like for like. The illumination will be warm white and the lights will be angled to light the signs only to avoid any kind of light pollution
