New cast iron hopper

Aluminum and UPVC gutters to be replaced with 125mm black cast iron gutters

Additional down pipe required to prevent the other down pipes and gutters from overflowing.

Down pipe to be 75mm diameter black cast iron.

Hopper and down pipe are to be repaired if possible and then painted black to match the rest of the rainwater goods.

If repair is not possible they will be replaces with black cast iron fluted, flat backed hopper and pipe to match the additional rainwater good proposed
