Description of Proposed Works

Please describe the proposed works

Proposed work consists of the addition of four small roof lights to the front of the property to service existing attic rooms. The position of the roof lights are in the sloping parts of the attic rooms and will sit alongside two large existing roof lights on the front elevation. Planning permission has already been granted for the addition of two large roof lights, however when plasterboard was removed from the attic rooms, the roof joists were too close together to fit the two large roof lights, so instead two smaller roof lights are proposed to be fitted either side of the roof joists, to allow fo the same amount of light that would have been afforded from one large roof light. The appearance of the proposed roof lights will be inkeeping with the existing roof lights, and will match four roof lights that exist on the back elevation.

There are no houses within view of the velux windows as the front of the property faces a field.
