Retrospective Planning application Objection
Case number: PL/2023/10685
The Squirrels, Blounts Court, Potterne. SN10 5QF

I object to the retrospective planning application for the annex window to the West elevation as shown in the attached photograph for the following reasons.

The application clearly states the works for the installation of the window is not complete. This is incorrect as the window was installed some time ago when the extension was being done to the roof area.

I have taken a photograph from our Master bedroom which is in direct line of view to the installed window.

The tree in the centre has been deemed unsafe by West Country Tree Services and this with the rest of the trees on my neighbours land have yet to be cut back and reduced despite previous promises. The tree removal will cause yet more intrusion on my privacy.

Our house until the previous developer destroyed the garden and took down all plants except the ones on our boundary was secluded and could not be seen by the Squirrels house.

I had no objections to my neighbours original plans as it kept all existing apertures and had no additional windows overlooking our property. The excavation works done as part of this development have left an open landscape exposing my property and destroying the seclusion we enjoyed for 20 years.

Whilst I appreciate that the annex above what was the garage has planning restrictions I do wonder as to what use this will be for.

Yours Sincerely

Erik MacGilp
