Horseshoe night/feeding roost building

Proposed new brick building at least 1.0 m wide, 2.0 m long, and 2.5 m high to the roof.
Pitched roof with tiles to match the garage with bitumen felt beneath. Rough-sawn timber untreated battens installed under roof for bats to hang on.
Entrance provided on the south facing elevation into the interior will be 750 mm wide and 500 mm high and at least 1.3 m above ground level.
