Good Afternoon Jonathan,

We're pleased to hear that the Environment Agency (EA) are happy with the information submitted on the liner and leak detection.

Further to our email correspondence earlier in June and the response received from the EA, please see attached management plan for the leak protection system and monitoring log. We've been trying to speak with the EA to check whether this would be sufficient information to negate the need for a pre-commencement condition – however after leaving a couple of answerphone messages and sending an email, I do not want to put undue pressure on them.

Please see attached two further documents which I hope provides sufficient information for you to be able to convert the condition, that has been suggested by the EA, from a pre-commencement to a compliance condition. We're keen to avoid pre-commencements to allow our contractor and client to commence works during the summer season.

If there is anything else I can do to help in order to progress the application in a timely manner, please do let us know.

Please do feel free to give me a call if it's easier to discuss.

Kind regards,

Sam Clough **ARB RIBA**
