Dear Mrs Pollard,

Thank you for your enquiry regarding the repointing of the brick rear elevation of No. 74 Winchester St. I am pleased to offer you my estimate to carry out the work which will be the removal of all existing hard cement mortar and subsequent replacement with a suitable lime mortar. Some brick replacements will be required and so a small number of matching bricks will need to be sourced.

I propose to do this work based on a day rate for two persons plus the cost of materials. The day rate is £ [redacted] and materials will be around [redacted]

I expect to complete the work in 6 to 8 days. It is difficult at this stage to be too precise as it will largely depend on the degree of difficulty in removing the existing mortar.

When obtaining quotes for scaffolding I suggest asking companies to include ' sheeting in ' as this will help contain any dust and debris from spreading to neighbouring properties.

I hope you will find this acceptable and I look forward to receiving your instruction. Please contact me if you have any questions.

Best regards

Robin Evans
