OFFICIAL

Good morning Hayley

I have just submitted the above application, for your information.

Here is my response to the comments that will inevitably follow from Salisbury and Wiltshire Swifts following validation.

We and DIO have already been in discussion Salisbury and Wilton Swifts regarding a previously approved planning application and we have received the attachments from them and where appropriate, these documents will be included within our tender documents for the projects that are included within our recent planning applications at Boscombe Down, Larkhill and Tidworth.

Ecology reports are always procured for all projects where this would be required and no work commences until an ecology report and any subsequent Natural England licences are in place. This is evidenced by the fact that we probably spend approximately £1.5 / £2 million per year on pre-commencement ecology services. Further, we would spend additional monies on ecologist supervision during the course of a project, as required by an ecology report or as a condition of a Natural England licence.

In addition the following ecological and sustainability items are included within our tender document, as standard, for our supply chain to take into account / tender where applicable.

1.11	**Ecology**	**Ecology Risk** An ecology report will be procured by VIVO and made available to the Subcontractor on receipt.

9.17	**Bee Bricks**	**Bee Bricks** The subcontractor is to price for the supply and installation of a Bee Brick in accordance with the specification found in Appendix A. Allowance should be made for all works to remove the existing brick and installation with mortar and pointing profile to match existing. To be installed to gable walls only, at high level - exact location to be agreed with Site Manager.
9.18	**Swift Bricks**	**Swift Bricks** The subcontractor is to price for the supply and installation of a Swift Brick in accordance with the specification found in Appendix A. Allowance should be made for all works to remove the existing brick and installation with mortar and pointing profile to match existing. Location to be agreed with Site Manager.
12.06	**Bat boxes**	**Installation of Bat Boxes** The Subcontractor is to price for the supply and installation of Schwegler Bat Boxes refer to Appendix A for details of bat box. Allowance must be made to fix the bat box to the finished EWI using a Swifix fixing system, please refer to Appendix A.
33.01	**Privacy Panels**	**Privacy Panels to accommodate EWI where fence is abutting the elevation.** The Subcontractor is to provide preservative treated Timber Privacy Panels (1800 mm high and 3600mm long), including timber gravel boards and concrete posts, to party fence line between properties, extending two panel's length from rear face of property. Note: In accordance with the Hamworthy Hedgehog Rescue website below, allowance must be made to incorporate Hedgehog Highways to all Privacy Panels, limited to one through way per garden. This include the requirement for the Hedgehog Highway Sign available to order from the website. https://hamworthyhedgehogrescue.org.uk/hedgehog-highways/#
38.01	**Waste Management**	**Waste Management** All waste to be managed in line with the requirements set out in the VIVO Environment & Sustainability Policy.
39.01	**Sustainable Timber**	**Sustainable Timber** All timber to be legally and sustainably sourced - See VIVO Environment & Sustainability Policy.
40.01	**Social Value**	**Social Value** The Subcontractor is invited to outline a proposal for creating social value through a conscious effort to improve the local community through social, economic or environmental means. Please complete the section below to provide a brief outline of your proposals: **Proposal:**

As an organisation I suspect that we are one of the most heavily 'policed' companies in the country when it comes our obligations, legal and moral, regarding ecology and this 'policing' starts with us but is also backed up by Defence Infrastructure Organisation.

All of the above has already been shared with Salisbury and Wilton swifts both by Vivo and Defence Infrastructure Organisation.

One final point I would like to make is should S&W Swifts refer to 'illegal' activity in 2021, this was not carried out by Vivo, as we did not commence working of the MoD Accommodation contract until April 2022.

Please do not hesitate to contact me should you require any further information.
Regards
