1 The High Street, Stourton, Warminster, Wiltshire, BA12 6QF

I am giving notification of work for the reduction of two cherry trees in a residents property on the Stourhead Estate during this winter 2023/24. The house is on the high street just before the Stourhead entrance. This work has come from the residents garden becoming dark and the trees over bearing. The first of these trees (Tag No 01023) in under overhead cables and would need to be reduced by 4-5 metres so it doesn't impede these cables. The second tree (Tag No 01022) is to be reduce by 3-4 metres and remove a lower limb, this is to bring some light back into a dark garden.

Hornbeam Pollards adjacent to allotment wall High Street Stourton

I am giving notification of work on the re-pollarding of a line of Hornbeam trees (15) in the front park at Stourhead during the winter of 2023/24. These trees run parallel to a wall that encloses the allotments and the Clock Lodge wall (circled on map). They are due to be re pollarded, this will also help the tenants of the allotments as the trees are slowly getting too tall and shading out some of the allotments.
