Description

Please describe details of the proposed development or works including any change of use

Erection of a replacement footbridge across the stream in the rear garden adjacent to the existing rotten and unsafe bridge and the subsequent removal of the existing bridge.

The existing bridge was formed from two telegraph poles placed onto the banks (it is thought) in the 1950s. One telegraph pole has rotted completely at one end and the softwood decking has deteriorated significantly. It is currently being supported by acro props as a temporary measure. It is therefore proposed to replace the footbridge with one formed on oak beams placed on bank saddles designed to maintain the integrity of the materials used. Details of the proposed structure are shown on the drawing accompanying this application. All ancillary woodwork will be in oak except the decking material in treated softwood.

Unfortunately, it hadn't occurred to me that replacing the bridge would require planning permission and I engaged a contractor to undertake with the works. However, I subsequently read an article in the national press which raised the question in my mind so I submitted an enquiry to WCC, the response to which (ENQ/2023/01642) was that planning permission is required. To date, the bank pads have been formed but work has now been suspended pending the outcome of this planning application.
