DESCRIPTION

Trusloe Manor dates back to the 16th century (see Heritage Statement) but has been recently extended with garaging and workshop which is the subject of this application. The grounds and gardens of this manor house have a series of "garden rooms" separated by high hedges which help mask and soften the effect of the 90's extension. These proposals are to convert and upgrade the workshop into an artist's studio, home office and summer room off the existing swimming pool.

Internal Photo

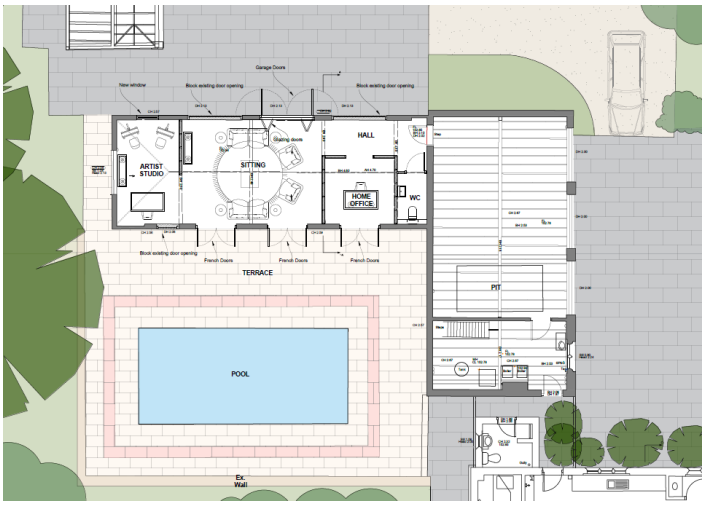

PLAN FORM

There will be no alterations to the current plan form and access to the new arrangement will be through the garage as the current arrangements. The artist studio and home office will have 2 m high screens

separating them from the central sitting area so the feeling of openness will be retained. It is proposed to close off 2 of the current pairs of doors to the parking courtyard and create a 3 balanced pairs of French doors onto the pool enclosure.

Plan As Existing

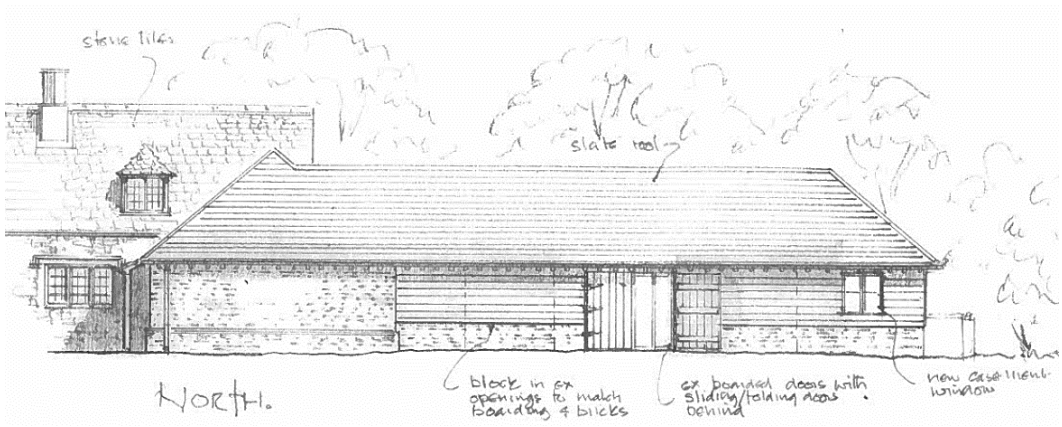

Plan As Proposed

SCALE

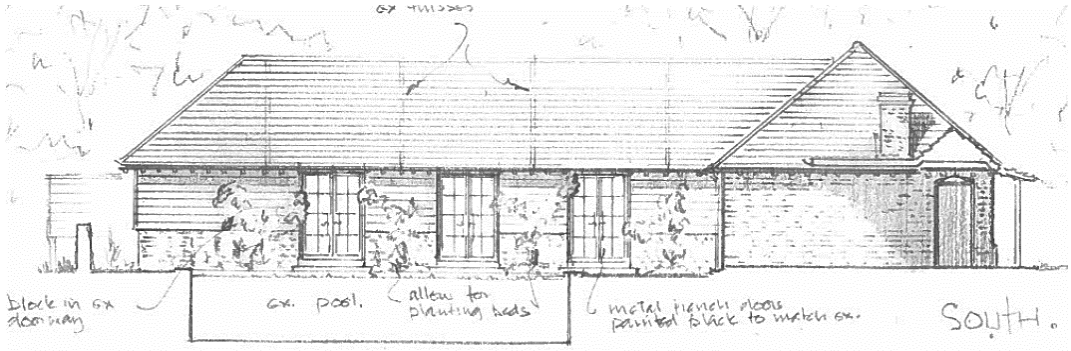

There will be no appreciable change in scale from the present arrangements.

MATERIALS AND DETAILS

The filling in of the current workshop external doors will be with matching timber boarding and brickwork. The remaining central pair of doors will remain with sliding folding doors internally opening to the courtyard. The pair of French doors onto the pool enclosure will be metal construction painted black to complement the existing metal windows throughout the building.

North Elevation

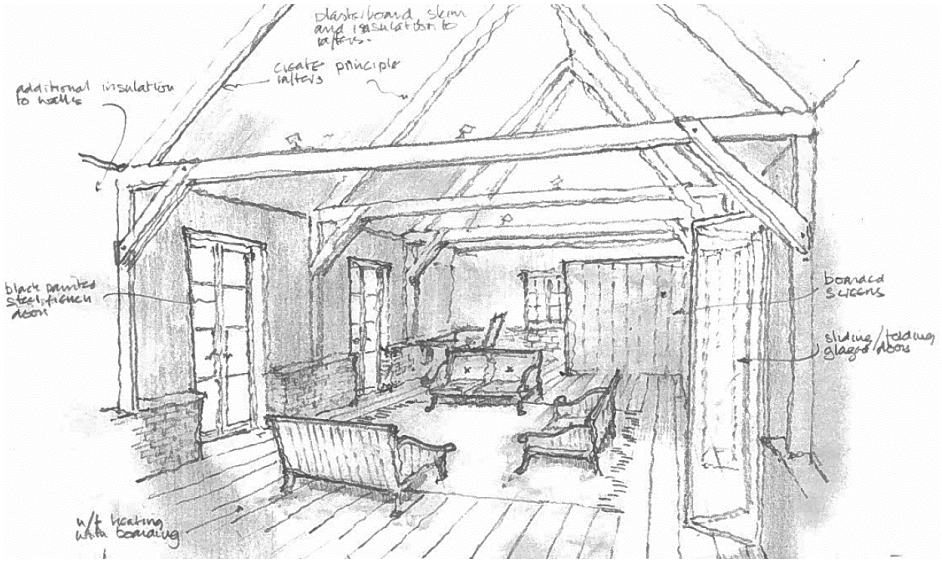

South Elevation

PRE-APPLICATION CONSULTATION

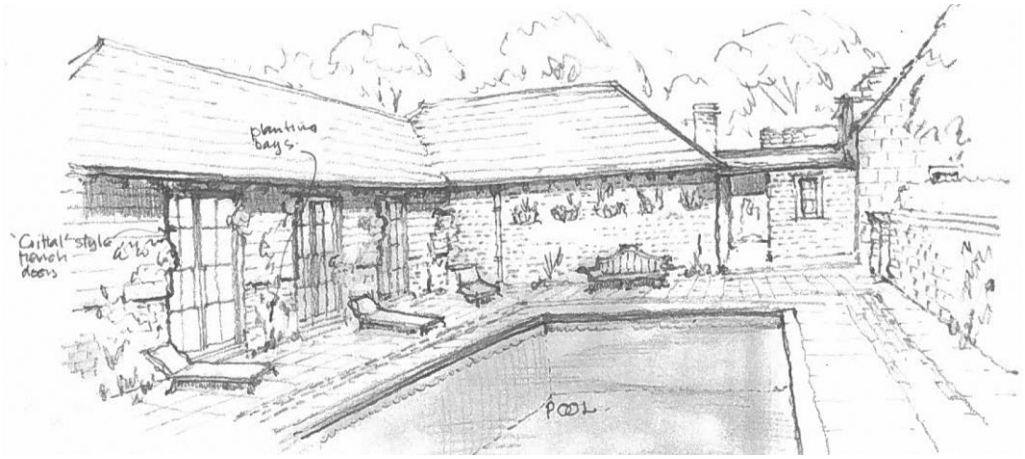

Following the report of the pre-app the scheme has been greatly reduced in scale omitting the link to the proposed reconstructed wood store and concentrating solely on the conversion of the current workshop.

LANDSCAPE

There will be no appreciable change to the current landscape and gardens with the exception of planting against the walls surrounding the pool.

Internal Perspective

Pool Perspective

ACCESS

There will be level access to the proposed conversion of the existing workshop.
