I agree with all points already very well made for objecting to this application.

In addition to the previous comments I attach photo evidence which shows the recent flooding on Chelworth road on the S bend and subsequent foul water coming up from the drains as the sewage system can not cope. Adding additional homes in this location, will exacerbate existing issues.

A suggestion has been made to alter the junction of The Forty/Purton road junction, which results in reducing the width of the road to 5.5m. As this road is used as a regular bus route, the minimum width as stated in the manual for streets is required to be 6m-6.75m.

The Forty/Fiddle and Chelworth Road are not suitable for construction traffic, the roads are far too narrow, have camber and will significantly increase the risk of a serious accident.
