

I object to this planning application due to the fact that infrastructure struggles to cope with the current number of houses in the road.

Please find attached photos taken in The Forty on 23rd Sept 24 after some hours of heavy rain.

These clearly not only show the flooding but also water (sewage ?) coming up a manhole indicating that the drains in The Forty can't cope with the few houses currently in the road! The planning application currently being considered calls for a large increase in houses off The Forty hence overloading the sewer even more than they are now!!
