

New Tree Specification (planting positions will be decided later)

New deciduous trees – Light Standard 1.8 - 2.4m Heights. Standards 2.4-3m Heights, bare root.
Or Evergreen trees, container grown 10Lt pots.

A 75mm depth of mulch to be applied to a distance of no less than 1m, from the stem

Maintenance

Year1. Weed control to be by "hand weeding". Staking - Stake to be attached no higher than 1 third tree height, - to promote incremental stem growth.

Watering - 25 litres every other week from April to September for the first 2 years and weekly during drought periods.

Inspect stake/tie/guard replace as necessary

Year 2 same as Year 1

SUPPLY OF PLANTS/ TREES

•Suppliers: Members of the Horticultural Trades Association Nursery Certification Scheme

TREE PITS

- Scarify horizontal bases and vertical sides.
- Pit bottom: Pit sides: Scarify.
- Backfilling material: good quality topsoil

Trees should be planted to a depth appropriate to the size of the plant stock which should be to the same depth at which they have been previously grown in the nursery.

The planting work should conform to the BS 8454 2014 Trees: From Nursery to Independence in the Landscape: Recommendations

Figure 2 Default specification for protective barrier

Key

- 1 Standard scaffold poles
- 2 Heavy gauge 2 m tall galvanized tube and welded mesh infill panels
- 3 Panels secured to uprights and cross-members with wire ties
- 4 Ground level
- 5 Uprights driven into the ground until secure (minimum depth 0.6 m)
- 6 Standard scaffold clamps

NOTE 1 Examples of configurations for steel mesh perimeter fencing systems are given in BS 1722-18.

Note 2 It might be feasible on some sites to use temporary site office buildings as components of the tree protection barriers, provided these can be installed and removed without damaging the retained trees or their rooting environment.

6.2.2.4 All-weather notices should be attached to the barrier with words such as: "CONSTRUCTION EXCLUSION ZONE - NO ACCESS"
