3. Description of the Proposal

Please describe the proposed development, including any change of use:

The proposed development is the installation of an 18-meter high, 11kW horizontal axis wind turbine (HAWT) manufactured by market leaders, Gaia. The wind turbine will be a freestanding tower-mounted turbine with two blades, designed to generate renewable electricity. The proposed turbine will fall under the category of micro-generation. The turbine can be connected to the grid therefore will need approval from the district network operator (DNO) however it is intended to provide a significant amount of the electricity to be consumed on site. Only the surplus will go back to the grid. If DNO approval is not forthcoming, we can explore the possibility of battery storage to make use of the electricity at times where generation is lower than demand.

Wiltshire Council's climate strategy has been adopted in response to the acknowledgement of a climate emergency. The council has committed to becoming carbon neutral by 2030. The council's ambition for Wiltshire as a county, beyond just the council's footprint, is to seek to achieve carbon neutrality by 2030. The initial strategy for attaining neutrality is to drastically reduce the Council's carbon emissions. The Energy Team seeks to do this by implementing renewable technologies to power and heat the buildings in the corporate estate. This has been successful with the installation of over 3MW of solar PV on the buildings and land that the Council own and operate. The 2022 Anthesis report on Wiltshire's carbon emissions demonstrates the progress made in this area. The report also shows that there is still a lot of work to do, specifically in utilising other forms of renewable energy technologies. The report states that wind power 'provides a significant opportunity to reduce dependency on fossil fuels' across Wiltshire. This is an area the Energy Team are seeking to develop and support.
