

To be viewed **digitally at 125% enlargement** - see notes below.

View looking north-northeast from Footpath CDUC 14, at a point approximately 380m northwest of where it meets Bridleway CDUC 8.

Notes: Cylindrical panoramic image - **to be viewed digitally** (see instructions for viewing below). If printed on A3 paper this image is for context only. A Reference Image of the indicated insert is provided in Appendix F.

Instructions for viewing digitally: All images must be viewed with the 100mm scale bar displayed at its true size (achieved by adjusting PDF zoom level). This represents a 125% or 150% enlargement as appropriate (refer to Technical Methodology in Appendix C). The images should then be viewed at comfortable arm's length (exact mathematical reference point = 542mm from eye to image) by maintaining the head in a constant position (without turning) and panning the image from side to side - this maintains a constant viewing distance across the panorama and provides the best recommended representation of the view found on site.

Photographs taken with a Nikon D3500 or D3400 digital SLR camera (cropped frame sensor) with a fixed focal length Nikon 35mm lens (refer to Technical Methodology in Appendix C). Photographs stitched together using Photomerge ('reposition only' layout) in Adobe Photoshop.

VIEWPOINT 10 - Annotated viewpoint photograph - 15th May 2025, 11:18

To be viewed **digitally at 125% enlargement** - see notes below.

View looking north-northeast from Footpath CDUC 14, at a point approximately 795m northwest of where it meets Bridleway CDUC 8.

Notes: Cylindrical panoramic image - **to be viewed digitally** (see instructions for viewing below). If printed on A3 paper this image is for context only. A Reference Image of the indicated insert is provided in Appendix F.

Instructions for viewing digitally: All images must be viewed with the 100mm scale bar displayed at its true size (achieved by adjusting PDF zoom level).
