Further to my last comment objecting to planning application
PL/2025/06596

These photos illustrate how access to the above site is just not feasible.
My neighbour ordered something and specified a small truck. The information did not get put through.
So this huge truck parked outside our cottage.

It then had to reverse to get out, which proved difficult even though the small parking lay-by had been vacated with news of the trucks arrival.

Kind regards
Val Jarvis
