Dear Mr Madge
Re: PL/2024/05527 Land South of Westwells Rd, Norton

I wish to express my increasing concerns about the proposed expansion in the number of Gata Storage constructions presently in my community. I have recently been made aware of the volume of water these installations use, and am worried of the future implications of this. To construct additional installations in this area seems foolish, and the possible outcomes in respect of our water supply

in this community are deeply disturbing.

In addition, the increased risk of flooding in the Neston & West Wells area are also worrying.

One final point: the data storage installations already in place are the ugliest of structures and are not sufficiently screened from view.

Please add my name to the list of those who are objecting to the said planning application PL/2024/05527.

Yours sincerely,
