Description

Please describe details of the proposed development or works including any change of use

The proposal involves the conversion of the recently constructed garage at 8 Long Leaze into a self-contained residential unit. This represents a change of use from ancillary domestic outbuilding (Class C3, incidental to the main house) to an independent dwellinghouse (Class C3).

The unit has been designed to meet a specific family need: to provide suitable end-of-life accommodation for a terminally ill relative, with facilities to support 24-hour care. The scheme provides a wheelchair-accessible bedroom with space for medical equipment, an accessible wetroom, kitchen and storage/boot room, together with a loft conversion to provide carer accommodation (bedroom and bathroom). Glazing to the rear elevation creates a bright, therapeutic environment, enabling the occupant to connect with nature and benefit from natural light and fresh air.

Although the development introduces a separate unit of accommodation, its purpose is closely tied to the needs of the existing household, ensuring that the family can provide essential medical and emotional support within close proximity.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Retrospective planning permission

Please justify the reason why biodiversity net gain does not apply:

Apart from changes to the external openings, the only changes to the existing garage building will be internal changes, therefore the surrounding habitat will not be impacted.

Note: Please read the help text for further information why developments may be exempt or not in scope.
