Description of the Proposal

Please note in regard to:

- **Fire Statements** - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. [View government planning guidance on fire statements](#) or [access the fire statement template and guidance](#).
- **Permission In Principle** - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- **Public Service Infrastructure** - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or [view government planning guidance on determination periods](#).

Description

Please describe details of the proposed development or works including any change of use

Proposal.

Erection of a single-storey ancillary agricultural office (factory-made Dunster cabin) measuring 5.89 m (L) × 3.99 m (W) with a maximum height of 2.5 m ridge (approx. 2.3 m eaves). The building is set approximately 3.0 m behind the Breach Lane carriageway edge. No new vehicular access is formed; staff/visitors continue to use the existing farm driveway, then access the office on foot within the holding. No running water / plumbing (no WC). No external lighting proposed.

Site & context.

The application relates to an established agricultural unit of around 18.0 hectares in continuous agricultural use for approximately 38 years. The immediate land is improved grass within a managed paddock. No designated sites are nearby and there are no adjacent watercourses.

Permitted development context.

Breach Lane is a C-classified road. Because the site sits within 25 m of the metalled part of a classified road, agricultural permitted development under GPDO Part 6 cannot be relied upon; therefore full planning permission is sought.

Use & need (ancillary to agriculture).

The office accommodates day-to-day farm administration: farm record-keeping and compliance (DEFRA, SFI/BPS/RPA), supplier communications and accounts, contractor coordination, and regulatory reporting. A modest insulated workspace on the holding improves operational efficiency, biosecurity and data security, and avoids unnecessary off-site travel. This is of greater importance as Mr. Woodfield begins to engage his son and daughter in the running of the farm. The ancillary office allows his daughter in law, who is of reduced mobility after a car accident, access to a shared working space. It is wholly ancillary to the agricultural enterprise and is not a general B-class office.

Design & appearance.

Fully insulated cabin with PVC doors and windows (double-glazed, dark finish) and Stained slow-grown spruce timber panelling (pressure-treated). Roof: 19 mm T&G spruce roof deck with black roof felt. A recessive rural finish (stained timber) and compact height (~3 m) limit visual impact. No external lighting preserves dark skies.

Trees and Hedges

Are there trees or hedges on the proposed development site?

☐ Yes

☒ No

And/or: Are there trees or hedges on land adjacent to the proposed development site that could influence the development or might be important as part of the local landscape character?

- ☐ Yes
☒ No

If Yes to either or both of the above, you may need to provide a full tree survey, at the discretion of the local planning authority. If a tree survey is required, this and the accompanying plan should be submitted alongside the application. The local planning authority should make clear on its website what the survey should contain, in accordance with the current 'BS5837: Trees in relation to design, demolition and construction - Recommendations'.

Assessment of Flood Risk

Is the site within an area at risk of flooding? (Check the location on the Government's [Flood map for planning](#). You should also refer to national [standing advice](#) and your local planning authority requirements for information as necessary.)

Will the proposal increase the flood risk elsewhere?

- ☐ Yes
☒ No

How will surface water be disposed of?

- ☐ Sustainable drainage system
☐ Existing water course
☒ Soakaway
☐ Main sewer
☐ Pond/lake

Biodiversity and Geological Conservation

Is there a reasonable likelihood of the following being affected adversely or conserved and enhanced within the application site, or on land adjacent to or near the application site?

To assist in answering this question correctly, please refer to the help text which provides guidance on determining if any important biodiversity or geological conservation features may be present or nearby; and whether they are likely to be affected by the proposals.

a) Protected and priority species

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

b) Designated sites, important habitats or other biodiversity features

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

c) Features of geological conservation importance

- ☐ Yes, on the development site
☐ Yes, on land adjacent to or near the proposed development
☒ No

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:
Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:
Under 25 square metres

Please justify the reason why biodiversity net gain does not apply:
Proposed development: Erection of a single-storey ancillary agricultural office (5.89 m × 3.99 m) within an existing farm holding. Habitat baseline at impact location: Improved/modified grassland (non-priority). Habitat impact area: ~23.5 m² (building footprint only). Linear habitat impact: 0 m (no hedgerow/ditch removal). Priority habitat: None present within the impact area. Exemption relied upon: Biodiversity Gain Requirements (Exemptions) Regulations 2024, Regulation 4 (de-minimis) — development is exempt where there is no impact on a priority habitat, < 25 m² area habitat impact, and < 5 m linear habitat impact. Conclusion: The proposal qualifies for the de-minimis exemption, therefore the mandatory BNG condition under the Environment Act 2021 does not apply. Evidence submitted: Site photos; plan showing the ~23.5 m² footprint; confirmation no hedgerow/linear habitat is affected.

Note: Please read the help text for further information why developments may be exempt or not in scope.

Foul Sewage

Please state how foul sewage is to be disposed of:

- ☐ Mains sewer
- ☐ Septic tank
- ☐ Package treatment plant
- ☐ Cess pit

Waste Storage and Collection

Do the plans incorporate areas to store and aid the collection of waste?

- ☐ Yes
☒ No

Have arrangements been made for the separate storage and collection of recyclable waste?

- ☒ Yes
☐ No

If Yes, please provide details:

There isn't any waste envisioned aside from the occasional paper waste from a printer which will be used in the home fires for the farmhouse.

Trade Effluent

Does the proposal involve the need to dispose of trade effluents or trade waste?

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
(b) an elected member
(c) related to a member of staff
(d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?
