

Harfield Driveway Gate – Highway Safety – 002

Gate will be more than 5 metres from the highway, with our longest car being 4.4metres long. 4.5 metres being the average car length in the UK, therefore traffic not disrupted (www.theengineeringchoice.com/what-is-the-average-car-length)

Buses could still enter the Bus stop if a car was stopped in-front of the gate, however hourly service so the likelihood of this is rare.

Automation will be fitted meaning the gate will already be open for entry when being used by ourselves.
