Development Services
Wiltshire Council

20th November 2025

Dear Sir/Madam,

Re: Application No: PL/2023/09142

I have received the same application for planning permission, that faded many months ago, for yet further destruction of nature at Junction 16 (M4) Swindon. The vast amount of traffic in this area must NOT be further facilitated. Your "relevant issues" should be preventing the initial consideration of this re-application. The current government is in total disarray and Wiltshire should be fighting back against it. Traffic noise is constant here at Upper Studley Farm already, and no one living locally should have to endure further noise; especially the deer, badgers, birds, and all wildlife.

Over the last decade plus, private car use has been encouraged, to the great detriment of all who live locally. The health of the nation is not considered when walking is made difficult. There is no safety for pedestrians crossing Junction 16, either by crossing points or pathways. When I take my wheelbarrow to fetch food for my chickens from the local shop I have to take secateurs with me to pass along the "footpath" at the side of the road. Wildlife is endangered and is liable to die out in respect of many species.

I'm convinced that Dick Lovett's desire to invest in yet more motoring is NOT the way to go. We need a halt to the mechanisation of our environment. His proposal is a mere money-making scheme.

Yours sincerely,

Mrs Penelope Ruth Baker
