

Highway Development Management Consultation Response

Planning Application Ref: PL/2025/08804

Site Address: Car Park, Leigh Delamere Motorway Services Westbound, Leigh Delamere.

Proposal: Creation of hard-standing areas and erection of equipment cabinets to facilitate an extension to existing EV charging hub.

Date of Consultation Response: 03/12/2025

I refer to the above consultation for planning advice dated 05/11/2025 with regard to permission for the creation of hard-standing areas and erection of equipment cabinets to facilitate an extension to existing EV charging hub.

The site has existing access from the M4 via slip roads, this road is managed by National Highways as such they should be consulted in this regard.

The proposals would provide 6 further spaces for EV charging as additional parking within the Service Station car park area.

It would not be considered that the proposals would attract additional vehicle trips of any material significance and therefore no objection would be raised.
