In the small granary, the failure is sufficient to make the building inaccessible, and needs careful consideration by a structural engineer with experience of buildings like this. From what can be seen through the door and underneath, there appears to have been a specific failure on the east side causing the plate and two or three floor beams to drop, leaving one of the two large cross beams supporting the first floor hanging perilously. Finding a safe way to support that beam should be given the highest priority. Removal of the roof tiles, suggested as a first step, will reduce the load and will permit some assessment of the structure from above. As this is expected to take some time to resolve, the building will be covered (probably by tarpaulin) and the tiles stored in one of the other barns. Owing to the length of time that the building will be in this condition, it is considered appropriate to be controlled via Listed Building Consent. The repairs subsequently identified should be discussed with the planning authority to ensure their acceptability and to confirm if consent is required. This can be dealt with under the umbrella of the current preapp request

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?

- ☐ Yes
- ☒ No
