Dear Sirs,

**CONSULTATION - EE LTD AND HUTCHISON 3G LTD
PROPOSED UPGRADE OF EXISTING ELECTRONIC COMMUNICATIONS APPARATUS AT 75260, LAND AT RUSHMORE FARM, TOLLAND ROYAL, SALISBURY, SP5 5PT (NGR E394940 N117402)**

EE Ltd is licensed to operate GSM (Global Systems for Mobile Communications), UMTS (Universal Mobile Telecommunications System) and LTE (Long Term Evolution) in the United Kingdom for the delivery of Second, Third, Fourth and, soon, Fifth Generation electronic communications services. Hutchison 3G Limited (known as the operator 3) is also sharing the EE network.

EE and 3 currently have a radio base station located at the above address. The site is a pivotal part of the operators' network in this area. In order to ensure that the site maintains power resilience in the case of emergency, should the permanent power supply fail, it is proposed to install a back-up generator at the site. To confirm, the generator will only be used in an emergency situation.

The purpose of this letter is to invite the Local Planning Authority, in accordance with planning policy guidance and Best Practice Commitments, to enter into discussions with regard to the proposal.

Information on the option identified is as follows:

Proposed location: **75260, LAND AT RUSHMORE FARM, TOLLAND ROYAL, SALISBURY, SP5 5PT (NGR E394940 N117402)**

Proposed development: The upgrade of the existing telecommunications site, comprising the installation of a generator within the existing fenced compound, and ancillary development thereto.

Please refer to drawings numbered 002 Site Location Plan, 100 Existing Site Plan, 150 Proposed Site Plan, 200 Existing Site Elevation, 250 Proposed Site Elevation – Issue A2.

The proposed works will all take place within the existing fenced compound. Due to the surrounding planting and distance from the nearest public vantage points, views of the proposed works will not be apparent from nearby public vantage points.

M Group Telecom Limited, a company registered in England and Wales with company number 10201726
Registered Office: Abel Smith House, Gunnels Wood Road, Stevenage SG1 2ST

+44 (0)1438 743744 enquiries@mgrouppltd.com

mgrouppltd.com

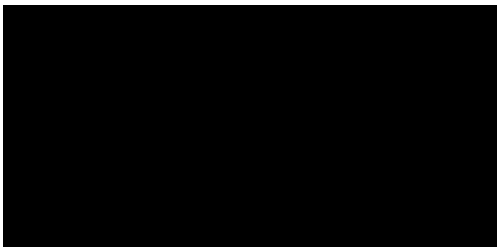

As the proposed works are required specifically at this site to provide power resilience in the case of emergency, no alternative sites were considered. The proposed upgrade of an existing site is in full accordance with the NPPF and Code of Practice guidance.

We confirm that the installation has been designed to be fully compliant with the public exposure guidelines established by the International Commission on Non-Ionizing Radiation Protection (ICNIRP). These guidelines have the support of UK Government, the European Union and they also have the formal backing of the World Health Organisation.

The proposal has been given a TLR of Green. Details of our proposed consultation exercise are contained within the enclosed consultation plan. We would welcome any comments the local authority has on this.

We look forward to receiving your comments on the option identified above. We respectfully request that any comments are submitted in writing within 14 days and include the site reference 75260.

Yours faithfully,

Dianne Perry MRTPI AssocRICS
