

Catchment Sensitive Farming Assessment Form

Applicant name	Andrew Quick
Farm Business name	PR & J Quick and Sons
CPH number	45/002/0134
SBI Number	107578744
Farm address, postcode and telephone number(s)	Upper Bearfield Farm, Ashley Road, Bradford on Avon, Wiltshire, BA15 1RT
WFD Water Management Catchment	Avon Bristol and North Somerset Streams
River Basin District	Severn
Form completed by:	
Name	Harry May
Company if applicable	Natural England
E mail address	[REDACTED]
Telephone number(s)	[REDACTED]
Pollutant priorities and pressures:	
Pollutant priorities in the catchment as targeted by CSF:	
Nitrates: Medium Priority Zone	
Pesticides:	
Sediment: Medium Priority Zone	
Phosphates: Medium Priority Zone	
Flood Risk Management:	
Air Quality:	
Farm description:	
• Dairy – 550 total livestock – 224 Hectares. • 200 dairy cows, 200 followers & 150 beef. • All stock on covered loose yards with straw bedding. • Farm runs a FYM based system by mixing bedding with scraped feed passage slurry. • Uncovered collecting yard drains to FYM store which has a perimeter drain which leads to slurry store. • Cows are grazed in summer months and winter housed. • Location – Ashley Road, Bradford on Avon – Bristol Avon Catchment • Connectivity to Watercourse – Approximately 754.5m to nearest watercourse (Bristol Avon (Semington Bk to By Bk) • Proximity to Protected Sites – Inwood, Warleigh SSSI is Approximately 1.6km to the Northwest.	

Catchment Sensitive Farming

Working together for a healthy environment

Pollutant pressures on farm i.e. water, air, natural flood management:

RP28 – Roofing – 344.8m² - Nitrates & Phosphate

- Uncovered collecting yard (Source). Rainfall onto these areas produces large volumes of slurry, causing pressure on slurry storage capacity.
- RP28 applied to these areas would remove rainfall onto these yards therefore reducing production of slurry and runoff.
- This would reduce Nitrate and Phosphate pollution by increasing slurry storage capacity allowing for more targeted spreading at appropriate times to maximize crop uptake of nutrients to help improve water quality.

Source: Uncovered collecting yard

Pathway: Surface Water Runoff & Slurry Collection

Receptor: Adjacent Fields, Ditches & Slurry store.

The following items are supported and approved by CSF for inclusion in a possible Capital Grants offer:

Capital Grant Item code	Field Number	Max agreed total to be applied for	Value of grant (£)	Additional text to be included in a possible Capital Grant offer e.g. description of item, what is being covered etc.
RP28	ST81615871	344.8m ²		Roofing of open loafing yard, total area 362.7m ² , but 17.9m ² will be self-funded due to WQ grant cap.
TOTAL				

Any other supporting information or documents

- Farm visit conducted by the CSFA on the 17th December 2024.
- Below Pictures and plans show the collection yard which is to be covered.

Catchment Sensitive Farming

Working together for a healthy environment

Additional requirements:

Please keep all invoices and photo evidence of before and after the works are completed. These should be sent to the RPA once a claim is ready to be made.

See requirements for options here:

Documents for applicant

- [Agreement holder's guide: Capital Grants, Higher Tier capital grants, and Protection and Infrastructure grants 2024 - GOV.UK \(www.gov.uk\)](https://www.gov.uk/guides/capital-grants-higher-tier-capital-grants-and-protection-and-infrastructure-grants-2024)

Catchment Sensitive Farming

Working together for
a healthy environment

RP28, where the proposal is to **roof** over sprayer washdown areas, manures stores, livestock gathering areas, slurry stores, silage stores, please refer to: -

- the need to keep dirty water and effluent separate from clean water
- the need to direct dirty water, effluent and clean water to suitable containment and management systems which comply, or will comply, with relevant legislation
- the need to cover a floor that is, or will be made, impermeable by the time the grant is claimed
- not directly lead to the expansion or intensification of the enterprise
- not to cover heaps of manure or silage in a field situation

Planning Permission – Some capital items e.g., buildings, concreting etc. will require evidence of planning permission or confirmation from the relevant planning authority that it is not needed. Therefore, applicants will need to refer to the relevant CS specification and submit the relevant evidence with their grant claim where required.

Justification to support the above approval or reasons for declining:

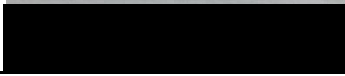

- **Below ALERT map shows connectivity to nearby watercourse.**
- **Farmyard itself has low connectivity, but diffuse pollution from slurry spreading on surrounding land is high risk.**
