

Details of planting for new sections of hedgerow

Hedge to be planted with a random mix of native species at 250mm centres in two staggered rows as shown in the diagram below:

All planting will be in accordance with the appropriate British Standard Specification. The planting will be protected with spiral rabbit guards, maintained weed free for at least 5 years and losses also within the first 5 years are to be replaced.

New hedgerow to be planted along north and west boundaries of the curtilage behind a stock proof post and wire fence.
