ASSESSMENT OF THE PROPOSAL

Context

In 2022 the LLFA had the following conditions for which information was required before these could be discharged

13. No intrusive groundworks shall commence until a scheme for the discharge of surface water from the site (including surface water from the access / driveway), incorporating sustainable drainage details together with permeability test results to BRE365 and location of top ground water level with soakaway sizing calculations and locations to ensure compliance with national requirements, has been submitted to and approved in writing by the Local Planning Authority.

Assessment

The LLFA has no objection to the variation in Condition.
