

Wiltshire Council Planning Consultation Response

ECOLOGY

Officer name:	Abi Gazzard
Date:	19/12/2025
Application number:	PL/2025/09031
Proposal:	Subdivision of existing dwelling to form a separate residence
Site address:	Leaside, 40 Longland, Salisbury, SP2 7ET
Case officer:	Joe Richardson

Recommendations:

☐	No Comment
☐	Support
☐	No objection
☐	Condition (no objection subject to conditions)
☒	Objection - further information required
☐	Objection in principle
☒	HRA required. The Appropriate Assessment (AA) included in these comments will be sent to Natural (NE) for their consideration once the below issue has been resolved.

Further Information Required:

	Issue	Policy/Legislative Compliance	Date information requested & Further information required	Satisfactorily addressed (Document & Date)
	Phosphorus neutrality	Habitat Regs	19/12/2025 Nutrient budget for overall 2 additional dwellings/units	

The outstanding document(s) listed above are needed to enable the council's ecology team to consider all the relevant impacts and benefits of the proposed scheme. The council's ecologists will provide a further response once all the above information has been submitted via the case officer. Please Note: When resubmitting a revised document, ALL changes must be highlighted to enable review.

Thank you for consulting Ecology. I have reviewed the application and supporting documents against OS Maps, aerial photography of the site and surrounding area, together with GIS layers of statutory and non-statutory designated sites and existing records of protected species.

Information considered:

- Nutrient Calculator River Avon SAC

The site comprises an existing dwelling proposed to be subdivided – there will be no enlargement of the existing footprint. The dwelling is located within an urban centre of Salisbury, surrounded by residential properties in all directions.

COMMENTS:

New Forest protected sites

The proposed development site lies within the 13.8km zone of influence for the New Forest internationally protected sites, which comprises the New Forest SPA, New Forest SAC and New Forest Ramsar site. Many of the special features of the New Forest protected sites afforded

protection are vulnerable to adverse effects associated with an increase in recreation as demonstrated in Natural England's supplementary advice issued for the SPA on 19 March 2019 and for the SAC on 18 March 2019.

Following a Cabinet decision on 7 May 2024, Wiltshire Council's "Interim recreation mitigation strategy for the New Forest internationally protected sites" (Version 1.1, 21 March 2023) is being revised. Cabinet approved revised mitigation measures to manage recreational pressures on the New Forest protected sites, including the cessation of use of Community Infrastructure Levy (CIL) to fund Strategic Access Management and Monitoring (SAMM) measures for minor residential development (1-49 dwellings) and tourism / visitor accommodation within the 13.8km zone of influence. Instead, SAMM measures are to be funded by developer contributions at a rate of £612 (plus legal fees) per unit of residential or tourism accommodation. This revision applies to all development that will result in a net increase in accommodation units within the 13.8km zone of influence from the New Forest protected sites and therefore applies to this application. Evidence for the revised approach derives from the New Forest SAMM Report (Footprint Ecology, October 2023) which can be found here: [Research into recreational use of the New Forest's protected habitats - New Forest National Park Authority \(newforestnpa.gov.uk\)](https://www.newforestnpa.gov.uk/research-into-recreational-use-of-the-new-forest-protected-habitats). The New Forest SAMM Report was commissioned by all the local planning authorities with areas lying within the 13.8km zone, in order to identify and implement a consistent strategic approach to mitigation across the zone of influence.

It will therefore be necessary for developer contributions of £612 per dwelling (plus legal fees) to be secured via s111 agreement, unilateral undertaking or s106 agreement for this application to ensure the necessary mitigation is secured. This will enable the Council to conclude, subject to endorsement from Natural England, that the development proposed by means of this application will not lead to significant adverse effects on the New Forest protected sites alone or in combination with other plans and projects.

The applicant should be directed to the Guidance Note for Completing Agreements Under S.111 of the Local Government Act 1972.

River Avon Special Area of Conservation (SAC) Hampshire Catchment

This development falls within the catchment of the River Avon SAC and has potential to cause adverse effects alone or in combination with other developments through discharge of phosphorus in wastewater. Appropriate Assessment (AA) must be carried out by the relevant Competent Authority (the LPA) to determine the potential significant effects, and the suitability of any measures proposed to avoid or mitigate those effects.

A nutrient budget has been submitted, calculating the nutrient burden of one additional dwelling. However, an email from the agent dated 11th December 2025 states that the proposal results in 2 x three bedroom properties, and 1 x one bedroom property, indicating a net increase of 2 new dwellings. The application form confirms that 3 dwellings are proposed. It is also not clear whether the applicant intends to proceed with the Council-led scheme of phosphorus credits.

The calculation must be amended to address this – by including “2” under dwellings/units in the nutrient calculator – or suitable justification provided, and resubmitted to the Council for approval. The calculation must be approved by the council to enable the AA to be undertaken, which must be completed, and the conclusion agreed with Natural England prior to the application being determined.

Guidance on completing the phosphorus budget is available on our website ([Phosphorus and nitrogen mitigation - Wiltshire Council](#)). This webpage also contains information on the options available for developments to achieve nutrient neutrality.

Biodiversity Net Gain

From 12 February 2024 Biodiversity Net Gain (BNG) became mandatory under Schedule 7A of the Town and Country Planning Act 1990 (as inserted by Schedule 14 of the Environment Act 2021). Based on the information available the biodiversity gain planning condition is not considered to apply to this application as the proposal is for retrospective development, and nonetheless would have been below the de minimis threshold, meaning the development:

- does not impact an onsite priority habitat (a habitat specified in a list published under section 41 of the Natural Environment and Rural Communities Act 2006); and
- impacts less than 25 square metres of onsite habitat that has biodiversity value greater than zero and less than 5 metres in length of onsite linear habitat (as defined in the statutory metric).

Note to case officer: you should be satisfied that the proposals meet the above criteria and act accordingly. Further information will be required from the applicant prior to determination in the event the application is considered to be subject to mandatory biodiversity net gain.

IN SUMMARY: Insufficient information has been submitted. In carrying out its statutory function, the LPA must be reasonably sure that the proposal will not result in significant adverse effects on protected habitats or species. The information outlined above must therefore be submitted and reviewed by the LPA's ecology team prior to determination of the application. I therefore maintain a holding objection until all the issues listed above have been suitably addressed.

CONDITIONS: wording to be provided once above issue has been addressed.

Sign off by WC Ecologist will only be given once ALL outstanding information has been submitted and agreed sufficient.
