

Plan of site showing proposed and existing Planting

Key

1. Existing Barn
2. Existing Glasshouse
3. Proposed Polytunnel

 Existing Trees

Proposed Trees & hedgerow development area

The species planted are Hazel, Birch and Oak, as well as other mixed native hedgerow species.

The idea is to reduce soil erosion within the site and provide a wildlife haven, in line with the goals of the woodland trust and the National Hedgelaying Society.

Photos of Hedgerow Development

These photos show areas where new saplings have been planted.

Red arrows show direction and location of photo.
