Dear Sir/Madam,

Re: 6 Clearwood, Dilton Marsh, Westbury, Wiltshire, BA13 4BD

We are writing to you regarding the discharge of condition application for the listed building approval PL/2023/04672 for the above address.

We are looking to discharge the following conditions and include the relevant information associated to each condition:

Condition 4 – Discharge of Surface Water Drainage

The sustainable drainage details for the discharge of surface water are as per the following drawing

2236.03.15 Rev A Proposed Site Plan

The intention is that the main building will have four downpipes from the roof that will include water butts which will act as an attenuation system and also provide a water source for the garden when water is limited.

If the water butts become full, they will have an overflow system that allows excess water to drain into the nearby attenuation soakaway that then allows to disburse into the nearby ground.

The proposed new section of the drive will include fall to either side and run into aco drains that also link into the new soakaway.

We trust that the above mentioned information provides the level of detail required to discharge the condition, however, if anything else is required, please do not hesitate to contact us.

Kind regards,

Stuart Kendrick
