Re: Application No. PL/2025/09748

Dear Sir/Madam,

Initially, it is very disappointing that a farm should not be sold as a farm, considering the necessity of feeding our growing population.

The present owner had scores of motor vehicles prior to "indoor sport/recreation" facilities. Now there are many vehicles travelling back and forth along the drive/walkway day and night, which are destroying it rapidly.

Apart from the noise, and the concern about being hit by a vehicle when walking in or out, the barns that have become gyms were drained by ditches around them, now no longer. This concerns me as my house, built to serve the farm, has always required drainage into this area. I do not want my house to be flooded.

I am surprised that I have only recently received from you notification of this application; the change of use having been set up for months.

I trust "Full Planning Permission" is not to allow yet further traffic, noise, disruption, nor flooding of my home?

Yours sincerely,

Mrs. Penelope Ruth Baker
