I refer to your application for the discharge of condition(s) attached to the above planning permission dated 12 December 2025. After careful consideration, the following decision has been made:

Condition(s) submitted for consideration:

Condition 3:

No development shall commence on site including demolition, ground works/excavation, site clearance, vegetation clearance and boundary treatment works, until a Construction Environmental Management Plan (CEMP) has been submitted to and approved in writing by the local planning authority. The Plan shall provide details of the avoidance, mitigation and protective measures to be implemented before and during the construction phase, including but not necessarily limited to, the following:

- Identification of ecological protection areas/buffer zones and tree root protection areas and details of physical means of protection, e.g. exclusion fencing.
- Working method statements for protected/priority species, such as nesting birds, reptiles, great crested newts, dormice, bats and badgers.
- A method statement for the control of invasive species, such as rhododendron
- Mitigation strategies already agreed with the local planning authority prior to determination, such as for bats; this should comprise the pre-construction/construction related elements of strategies only.

- Work schedules for activities with specific timing requirements in order to avoid/reduce potential harm to ecological receptors; including details of when a licensed ecologist and/or ecological clerk of works (ECoW) shall be present on site.
- Key personnel, responsibilities and contact details (including Site Manager and ecologist/ECoW).

Development shall be carried out in strict accordance with the approved CEMP.

REASON: To ensure adequate protection and mitigation for ecological receptors prior to and during construction, and that works are undertaken in line with current best practice and industry standards and are supervised by a suitably licensed and competent professional ecological consultant where applicable.
