

Wiltshire Council Planning Consultation Response

ECOLOGY

Officer name: Mary Holmes MCIEEM

Date: 19/01/2026

Application No: PL/2025/09827

Proposal: Proposed garden studio to be used as an ancillary annex

Site Address: 5 Bowden Hill, Lacock, Chippenham, SN15 2PW

Case Officer: Alex Edge
Householder Planning Application

Recommendations:

☐	No Comment
☐	Support
☐	No objection
☒	Condition (no objection subject to conditions)
☐	Objection - further information required
☐	Objection in principle
☐	HRA

Further Information Required

	Issue	Policy/Legislative Compliance	Date information requested & Further information required	Satisfactorily addressed (Document & Date)
1.				

The outstanding document(s) listed above are needed to enable the council's ecology team to consider all the impacts and benefits of the proposed scheme. The council's ecologists will provide a further response once all the above information has been submitted via the case officer. Please note: Any changes to the documents previously submitted must be highlighted, otherwise they will not be considered.

Matters Considered:

Thank you for consulting me on the above application in relation to ecology. I have reviewed the relevant submitted information as listed below and looked at the scheme against various mapping (OS and aerial) of the surrounding areas together with a review of designated sites and existing records of protected/notable species.

Biodiversity Net Gain

From 12 February 2024 Biodiversity Net Gain (BNG) became mandatory under Schedule 7A of the Town and Country Planning Act 1990 (as inserted by Schedule 14 of the Environment Act 2021). Based on the information available the biodiversity gain planning condition is not considered to apply to this application as:

- the application is for development which is subject of a householder application within the meaning of article 2(1) of the Town and Country Planning (Development Management Procedure) (England) Order 2015.

Note to case officer: you should be satisfied that the proposals meet the above criteria and act accordingly. Further information will be required from the applicant prior to determination in the event the application is considered to be subject to mandatory biodiversity net gain.

Core Policy 50

Core Policy 50 of the Wiltshire Core Strategy requires all development to demonstrate no net loss of biodiversity and to seek opportunities to enhance biodiversity. The NPPF also encourages applications to deliver measurable net gains (para 193d). Small scale enhancements can be secured via a planning condition.

Conditions & Informative:

ECO. 1

No development shall commence on site, until a Construction Method Statement which shall include a marked-up plan showing protection measures to the adjacent hedgerow and pollution protection measures to the adjacent stream during construction works has been submitted to, and approved in writing by the Local Planning Authority.

The development shall not be carried out otherwise than in accordance with the approved Construction Method Statement.

REASON: To ensure the development avoids causing harm to the adjacent watercourse.

ECO. 2

Prior to the commencement of any works, including vegetation removal and demolition, details of the number, design and locations of ecological enhancement features including bat and bird boxes shall be submitted to the Local Authority for approval. The approved details shall be implemented for the lifetime of the development and before completion of the final works.

REASON: To provide mitigation /enhancement for biodiversity and comply with Core Policy 50.

Informative

The applicant should note that under the terms of the Wildlife and Countryside Act (1981) and the Conservation of Habitats and Species Regulations 2017 (as amended) it is an offence to disturb or harm any protected species including for example, breeding birds, bats and reptiles. The protection offered to some species such as bats, extends beyond the individual animals to the places they use for shelter or resting. Please note that this consent does not override the statutory protection afforded to any such species. In the event that your proposals could potentially affect a protected species you should seek the advice of a suitably qualified and experienced ecologist and consider the need for a licence from Natural England prior to commencing works. Please see Natural England's website for further information on protected species.

Final sign off – all matters addressed:
