Dear Sir/ Madam,

Cellnex UK

Submission of an Application for Planning Permission

The removal of 3 no. antenna, and the installation of 6 no. antenna and ancillary radio equipment onto new and existing support poles at existing rooftop site along with ancillary development thereto.

Salisbury ATE Complex, Scots Lane, Salisbury, Wiltshire, SP1 3TR (NGR E: 414438 N: 130201)

On behalf of Cellnex UK in conjunction with Mobile Network Operator (MNO) Vodafone, we submit herewith an application for planning permission for the development of electronic 5G communications apparatus at the above site.

We enclose the following:

- i. The completed planning application forms, including the relevant landownership and agricultural holdings certificates
- ii. An O.S. site plan scale (1:2500) reference 00-004 showing the red line area
- iii. Drawing nos.

04-000A Existing Site Layout
04-002A Existing Elevation
04-110A Proposed Site Plan
04-160A Proposed Elevation

- iv. Electronic payment of £588 in respect of the appropriate fee has been made via the portal.
- v. 5G Technical Support document

- vi. National Policy – Delivering Ultra Fast Broadband Mobile Connectivity
- vii. 5G – Helping tackle climate change document.
- viii. A certificate of ICNIRP compliance
- ix. 5G Health and Safety document
- x. Supporting Planning and Heritage statement.

Please also take this application and the details contained within it as due Notification, as may be required, under the relevant conditions of the Electronic Communications Code (Conditions and Restrictions) Regulations 2003, as amended. In particular, you are given notice of the intention to install the electronic communications apparatus described in more detail in the application documentation (including the scale drawings) and to be located as shown on the application plans.

In accordance with best practice guidelines and the advice contained in national policy, the operators are committed to undertaking wider engagement with the local community and other stakeholders who may have an interest in the development. The proposal has, therefore, been assessed using Traffic Light Rating Model in order to establish an appropriate level of engagement. The proposal has been categorised as 'green' and we therefore have not carried out any wider community engagement although we did write to the local ward councillors.

We would be willing to meet to discuss the merits of the application, or to assist with any visits of the site and surrounding area, if this is beneficial to the determination of the application.

We trust everything is in order, but please contact me if you require any additional information or clarification in relation to the proposed development.

Yours faithfully,

Matthew McGimpsey
For and on behalf of Cellnex UK
