

Windows and doors to be painted in Silver Fur Blue

Reinforced concrete slab, 150mm thick, with mesh reinforcement for the base

Materials: Northern European Spruce from managed forests. 58mm tongue and groove timber boards fasten together, interlocking at the corners to create the walls. Sturdy roof joists create a foundation for the tongue and groove timber ceiling which is finished with an EPDM rubber roof. The 21mm tongue and groove floor is laid on top of pressure-treated floor joists.

The roof is finished with a durable EPDM rubber roof membrane and a 2-3 degree slope for water run-off.
