

HERITAGE STEELYTE SLIM LEADED OPENER

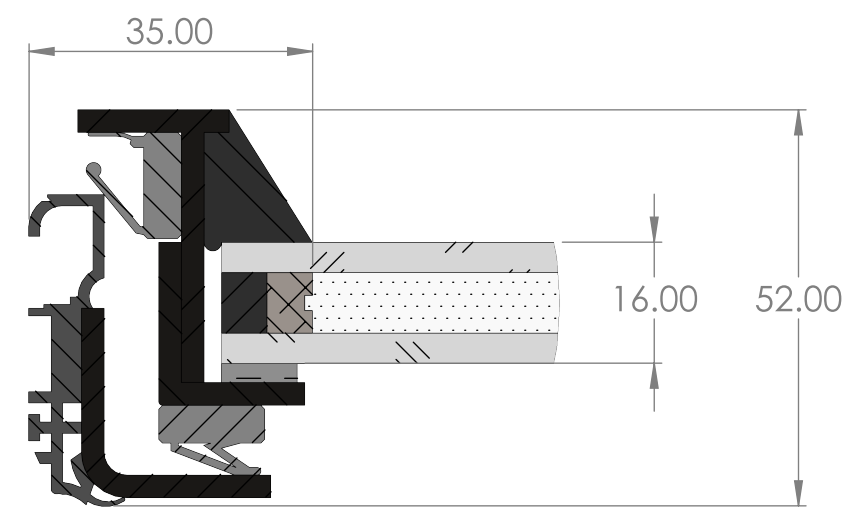

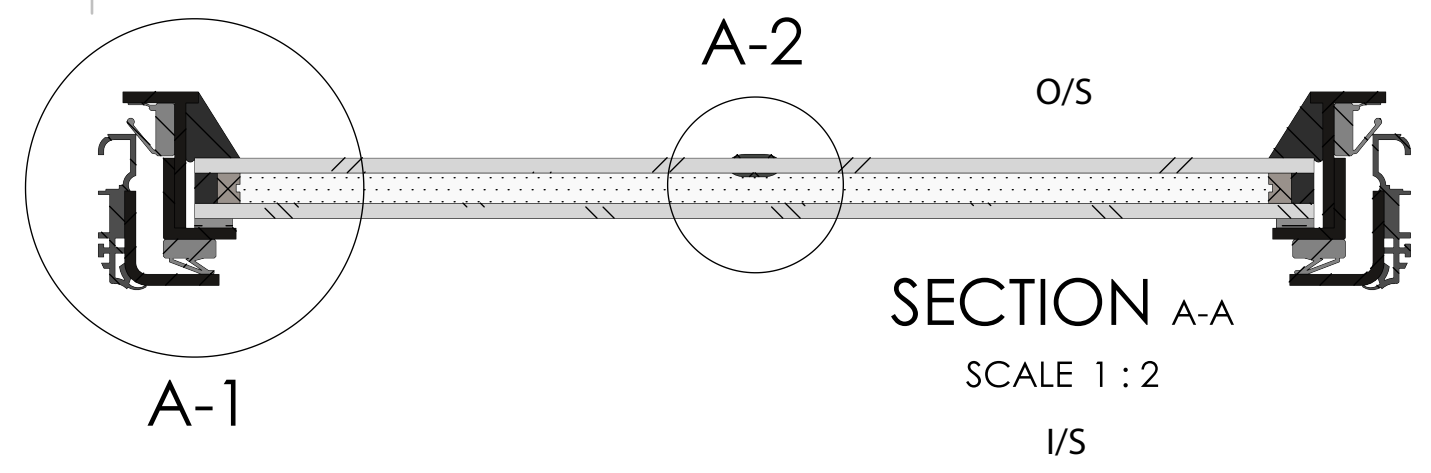

SCALE 1:5

SPECIFICATION:

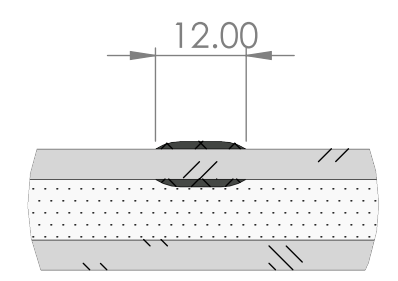

- Outer pane: Albion Crowne 4mm Optiwhite. (Albion Crowne glass gives the appearance of hand drawn glass with seeds and imperfections)
- Inner pane: 4mm Pilkinton KA.
- Argon filled cavity.
- 8mm Swiss U warm edge spacer bar.
- Toughened as standard.
- 12mm and 14mm Units are available with Krypton gas if required by conservation.

STEELYTE SLIM:

- Touchstone Steelyte® Slim opening casements are uniquely designed and constructed from high-grade 304 stainless steel.
- Thermally broken and fully weather stripped, they take from 12mm up to 20mm Argon filled units.
- They combine the narrowest of sight lines of 35mm with security, durability, and elegance.
- The Stainless steel is all but immune from corrosion therefore ideal for coastal properties. Powder coated to any RAL Colour, and 'putty' pointed for the heritage market.
