Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:

Biodiversity Net Gain (BNG) does not apply to this proposal as the application is solely for Listed Building Consent and relates to minor works within the curtilage of an existing residential property. The proposed works comprise modest alterations and replacement structures associated with the use of the building and do not constitute development requiring planning permission in their own right. In accordance with Schedule 7A of the Town and Country Planning Act 1990 and the Biodiversity Gain Requirements (Exemptions) Regulations 2024, applications for Listed Building Consent are not subject to mandatory Biodiversity Net Gain. Furthermore, the proposals do not involve the creation of new dwellings, a material change of land use, or any loss of habitat. The works are confined to previously developed areas and will not affect priority habitats or designated ecological sites. On this basis, Biodiversity Net Gain is not applicable, and no biodiversity metric or net gain assessment is required to support this application.

Note: Please read the help text for further information why developments may be exempt or not in scope.
