| This survey has been carried out to an accuracy consistent with a presentation scale of 1:200; therefore interrogated dimensions will be within the tolerance associated with this scale. The same caution applies to the plotting scale; all measurements are equally applicable to digital data supplied for CAD. The scale of this drawing should not be changed without permission. |                                              |                                      |                                  |
| Boundaries shown are not necessarily legal boundaries.                                                                                                                                                                                                                                                                                                                                  |                                              |                                      |                                  |
| Building footprints edged with a solid line have been surveyed. Where the outline is merely highlighted the footprint is indicative only.                                                                                                                                                                                                                                               |                                              |                                      |                                  |
| All levels, heights, measurements and dimensions are in metres unless otherwise stated.                                                                                                                                                                                                                                                                                                 |                                              |                                      |                                  |
| Eaves levels are generally surveyed at the end of the roof slate/tile/hatch. In cases where this is not possible the top of the gutter is surveyed instead. Where underside of fascias or eaves features are surveyed these are recorded as such.                                                                                                                                       |                                              |                                      |                                  |
| All below-ground features (including drainage, voids and services) have been identified from above ground and therefore all details relating to these (such as size, shape, pipe positions and alignments etc.) cannot be guaranteed as such.                                                                                                                                           |                                              |                                      |                                  |
| Underground services have not been traced, but any visible surface features have been located. No allowance has been made for any sub-surface manholes or other chambers or voids below ground level. While every effort is made to identify all visible above-ground features, it should be noted that there may be features obscured at the time of survey.                           |                                              |                                      |                                  |
| Spot heights at edges of roads are post (if circular), showing top of kerb unless otherwise stated.                                                                                                                                                                                                                                                                                     |                                              |                                      |                                  |
| Trees have been drawn diagrammatically (i.e. Crutcher), noting average canopy spread, however their true shape in plan will be different.                                                                                                                                                                                                                                               |                                              |                                      |                                  |
| All heights within the drawing relate to OD datum (AOD) unless specified otherwise.                                                                                                                                                                                                                                                                                                     |                                              |                                      |                                  |
| Measurements to internal walls have been taken to the wall finishes at approximately 1m above floor level and assumed to be vertical.                                                                                                                                                                                                                                                   |                                              |                                      |                                  |
| <b>LEGEND</b>                                                                                                                                                                                                                                                                                                                                                                           |                                              |                                      |                                  |

| <p>The horizontal &amp; vertical control of this survey is based on Ordnance Survey grid as translated from GPS co-ordinates using the OSN02 &amp; OSGM02 transformation as supplied by OS. We have applied a reverse scale factor to maintain true ground distances. Vertical values may differ from existing OS benchmarks in the vicinity which should be disregarded. All levels should be taken from ADS survey control.</p>                                                                                                                                                                                                                                                                                                                                                  |           |                                                               |
