

Wiltshire Council Planning Consultation Response

ECOLOGY

Officer name:	Jessica Cracknell
Date:	23/01/2026
Application Number:	PL/2025/08345
Proposal:	Erection of two semi-detached three-bedroom dwellings on land adjacent to 35 Beaulieu Road
Site Address:	35 Beaulieu Road, Amesbury, Salisbury, SP4 7PD
Case Officer:	Hayley Clark

Recommendations:

☐	No Comment
☐	Support
☐	No objection
☐	Condition (no objection subject to conditions)
☒	Objection - further information required
☐	Objection in principle
☐	HRA.

Further Information Required:

	Issue	Policy/Legislative Compliance	Date information requested & Further information required	Satisfactorily addressed (Document & Date submitted)
1	Biodiversity Net Gain (BNG)	Schedule 7A of the Town and Country Planning Act 1990 (as inserted by Schedule 14 of the Environment Act 2021)	23/01/2026 Submission of statutory metric calculation with associated habitat plans and condition assessments	NO
2	Ecological Parameters Plan	CP50, NPPF	23/01/2026 Provision of a suitably detailed Ecological Parameters Plan (EPP).	NO

The outstanding document(s) listed above are needed to enable the council's ecology team to consider all the relevant impacts and benefits of the proposed scheme. The council's ecologists will provide a further response once all the above information has been submitted via the case officer.

Please Note: When resubmitting a revised document, **ALL** changes must be highlighted to enable review.

Thank you for your consultation on the above application. I have reviewed the submitted documents against OS maps, aerial photographs of the site and surrounding area, together with GIS layers of statutory and non-statutory designated sites and existing records of protected species.

The following submitted documentation was reviewed to inform this response:

- Natural England Nutrient Neutrality budget calculator for the River Avon SAC;
- RE: 25016-Proposed Erection of Two Dwellings, Land Adjacent to 35 Beaulieu Road, Amesbury. 18 October 2025. Dale Roberts Design.

- Biodiversity Net Gain Documentation. October 2025. Dale Roberst Design Architectural Services;
- Proposed Site Plan. October 2025. Dale Roberts Design/ Drawing No. 25016/P004;
- Existing Site Plan. Site Block Plan. October 2025. Dale Roberts Design. Drawing No. 25016/P002;
- Design & Access Statement. October 2025. Dale Roberts Design. Ref No. 25016DAS01;

Salisbury Plain Special Protection Area (SPA)

This application lies within the 6.4km zone of influence of the Salisbury Plain SPA and in light of the HRA for the Wiltshire Core Strategy and the HRA for the Wiltshire Housing Site Allocations Plan it is screened into Appropriate Assessment due to the potential impact of recreational pressure on stone curlew in combination with other plans and projects.

A strategic Appropriate Assessment (AA) has been prepared pertaining to development within the 6.4km zone of influence that could result in a likely significant effect on the SPA as a result of an increase in recreational / visitor pressure. The AA reached a conclusion of no adverse effects on the integrity of the SPA or its qualifying features provided that the council's mitigation strategy continues to be implemented. Annual stone curlew monitoring and protection measures continue to be secured by the Council.

In January 2026 Natural England (NE) confirmed that the 2026 strategic AA for Salisbury Plain SPA continues to be supported by NE.

Habitat Regulations Assessment: River Avon Special Area of Conservation (SAC) Hampshire Catchment

This development falls within the catchment of the River Avon SAC and has potential to cause adverse effects alone or in combination with other developments through discharge of phosphorus in wastewater. Appropriate Assessment must be carried out by the relevant Competent Authority (the LPA) to determine the potential significant effects and the suitability of any measures proposed to avoid or mitigate those effects.

The submitted nutrient calculation calculated a total phosphorus budget of 0.23 kg TP/year pre 2030 and 0.06 kg TP/year post 2030. The budget has been approved by Wiltshire Council.

A Council-led scheme of phosphorus credits will be available for development which meets certain criteria at a fixed cost per kilogram of phosphorus, provided supply of mitigation is available. A completed Hampshire Avon Credit Screening Approval Certificate is required to apply for this scheme. The ecology section of this certificate has been completed by the Council's ecology team for this application. This certificate can only be issued by the case officer if the application meets the two deliverability tests. Further details of the Council-led scheme, including eligibility criteria, current cost to purchase credits, and details of how to apply, is available on our website [Phosphorus and nitrogen mitigation - Wiltshire Council](#).

Ecology officer approval	Document reviewed – 16/01/2026
Approval of Nutrient Budget	Pre 2030 budget - 0.23 kg TP/year Budget approved - Yes
	Date - 16/01/2026

A strategic Appropriate Assessment (AA) has been prepared for qualifying planning applications for residential and non-residential development, within sewered and non-sewered areas of the River Avon SAC catchment. The AA reached a conclusion of no adverse effects on the integrity of the SAC or its qualifying features and has been endorsed by Natural England (NE) provided that the council's mitigation strategy continues to be implemented.

These comments assume that this application qualifies for and will be proceeding with the Council-led scheme.

The mitigation fee and administration charge for the scheme can be paid by a section 111 agreement. It is also possible to pay the mitigation fee through a section 106 agreement or unilateral undertaking.

NEXT STEPS:

- The case officer will send you the credit screening approval certificate
- Once you have received this you can apply directly via this form: [Development Application in the Hampshire Avon Catchment](#)
- You will then be emailed directly when credits are available (expected 2 weeks)
- There is then the option of securing credits via a Section 111 form which will be sent to you.

If the application does not qualify for the Council-led scheme, or the applicant decides not to proceed with the scheme, details of an alternative mitigation strategy must be submitted for review and the Council's ecology team consulted. Any alternative mitigation scheme would be subject to a bespoke Appropriate Assessment.

Protected Species

The construction of new dwellings will not require the removal of any vegetation considered to be functionally valuable to foraging or commuting bats. Therefore, it is my view that there is no mechanism for adverse effect on bat species.

Where possible, vegetation removal should be scheduled outside the bird breeding season (1st March–31st August) to avoid potential disturbance. If removal during this period is unavoidable, a pre-works nesting bird inspection must be conducted no more than two weeks before vegetation clearance begins. The applicant is advised to check any structure or vegetation capable of supporting breeding birds and delay removing or altering such features until after young birds have fledged. Damage to extensive areas that could contain nests/breeding birds should be undertaken outside the breeding season.

Vegetation across the site should be retained, protected, and enhanced wherever possible. Any areas identified for retention must remain undeveloped and, where appropriate, be enhanced and incorporated into the site's landscaping scheme in order to protect and improve biodiversity.

The habitat within the proposed development site and the surrounding area is suitable for roosting, foraging and commuting bats. An increase in artificial lux levels can deter bats which could result in roost abandonment and/or the severance of key foraging areas. This will likely result in a significant negative impact upon the health of bat populations across the region. Any new lighting should be for the purposes for safe access and security and be in accordance with the appropriate Environmental Zone standards set out by the Institute of Lighting Engineers in their publication GN01:2021, 'Guidance for the Reduction of Obtrusive Light' (ILP, 2021), and Guidance note GN08/23 "Bats and artificial lighting at night", issued by the Bat Conservation Trust and Institution of Lighting Professionals.

Biodiversity Net Gain

This application was submitted after Biodiversity Net Gain (BNG) becoming mandatory however information required for applications subject to the biodiversity gain condition has not been submitted.

Applications subject to the biodiversity gain condition must be accompanied by minimum information set out in [Article 7 of The Town and Country Planning \(Development Management Procedure\) \(England\) Order 2015](#), which includes:

- [the completed metric calculation tool](#) showing the calculations of the pre-development biodiversity value of the onsite habitat on the date of application (or proposed earlier date) including the publication date of the biodiversity metric used to calculate that value;
- a description of any [irreplaceable habitat](#) (as set out in [column 1 of the Schedule to the Biodiversity Gain Requirements \(Irreplaceable Habitat\) Regulations 2024](#)) on the land to which the application relates, that exists on the date of application, (or an earlier date); and
- plan(s), drawn to an identified scale and showing the direction of North, showing onsite habitat existing on the date of application (or earlier proposed date), including any irreplaceable habitat (if applicable).

Note: this is a summary, please refer to Paragraph: 011 [Biodiversity net gain - GOV.UK](#) for full details.

If the applicant considers that the development would not be subject to the biodiversity gain condition, Schedule 7A of the Town and Country Planning Act 1990 the applicant must provide a statement as part of the planning application setting out the reasons why they believe this is the case. Submission of a completed metric calculation tool may be necessary to evidence the statement.

Core Policy 50

Core Policy 50 of the Wiltshire Core Strategy requires all development to demonstrate no net loss of biodiversity and to seek opportunities to enhance biodiversity. The NPPF also encourages applications to deliver measurable net gains (para 186 d).

While it is not expected that this development will result in significant loss of habitat, both CP50 and NPPF requires the inclusion of biodiversity enhancements, such as bird and bat boxes. Ecological enhancements are provided through the installation of bird and bat boxes, within Biodiversity Net Gain Documentation. The location of ecological/biodiversity enhancements must be included in the site plan drawings and will become an enforceable part of the planning permission. Bird/bat boxes will continue to be available for bats/birds for the lifetime of the development. Please see condition below.

Parameters Plan

An ecological parameters plan must be submitted, clearly outlining all habitat types, their connectivity, and their functionality to support species movement across the landscape. This plan should specify the habitats to be retained and managed to ensure the site's continued functionality for wildlife, in accordance with the CP50 and NPPF, which mandate no loss of functional habitat in the local area and where possible, a gain for biodiversity.

Insufficient information has been submitted. In carrying out its statutory function, the LPA must be reasonably sure that the proposal will not result in significant adverse effects on protected habitats or species. The information outlined above must therefore be submitted and reviewed by the LPA's ecology team prior to determination of the application. I therefore maintain a holding objection until all the issues listed above have been suitably addressed

DRAFT CONDITIONS: these will be finalised once the issues above have been addressed

1. Compliance with submitted documents

The development will be carried out in strict accordance with the following documents:

- TBC

REASON: For the avoidance of doubt and for the protection, mitigation and enhancement of biodiversity.

2. River Avon Phosphorus Mitigation

The development hereby permitted shall not commence until evidence of compliance to the Wiltshire Council River Avon Special Area of Conservation Mitigation scheme, or an alternative approved mitigation package addressing the additional nutrient input arising from the development, has been submitted to, and approved in writing by the Local Planning Authority.

REASON: To accord with the Conservation of Habitats and Species Regulations 2017, and Wiltshire Core Strategy Core Policy 69.

3. Water Efficiency in Hampshire Avon Catchment

The overnight development hereby approved shall be designed to ensure it does not exceed 110 litres per person per day water consumption levels (which includes external water usage) and a water efficiency assessment should be submitted. Before the development is brought into use, a water efficiency report certifying that this standard has been achieved shall be submitted to the local planning authority for its written approval.

REASON: To ensure compliance with the prevailing mitigation strategy for nutrient neutrality in the water catchment within which this development is located.

A water efficiency calculation will be needed to discharge this condition. For guidance on how to do this and what is required, please refer to the following document: *'The Building Regulations 2010 – Sanitation, hot water safety and water efficiency'*, Appendix A (p36-44).

4. Ecological Enhancements

Prior to the commencement of any works, including vegetation removal and demolition, details of the number, design and locations of bat roosts and nesting opportunities for birds (e.g. bat and bird boxes) shall be submitted to the local authority for approval. The approved details shall be implemented before occupation of the final works.

REASON: To provide mitigation /enhancement for biodiversity.

5. Ecological Parameters Plan

At Reserved Matters, the design and layout of the site will be in accordance with the Ecological Parameters Plan [TBC] This document sets out the ecologically sensitive areas of the site that will be retained, protected and enhanced. It will not be altered at Reserved Matters without detailed justification based on additional habitat and wildlife species surveys.

REASON: To protect the ecologically sensitive features of the site.

6. Lighting

All lighting provided on site shall be in accordance with the appropriate Environmental Zone standards set out by the Institute of Lighting Engineers in their publication GN01:2021, 'Guidance for the Reduction of Obtrusive Light' (ILP, 2021), and Guidance note GN08/23 "Bats and artificial lighting at night", issued by the Bat Conservation Trust and Institution of Lighting Professionals.

REASON: In the interests of the amenities of the area and to minimize impacts on biodiversity caused by light spillage to areas above and outside the development site.

INFORMATIVES:

Hampshire Avon Phosphorus Mitigation

Evidence of compliance to the Wiltshire Council River Avon Special Area of Conservation Mitigation Scheme means the certificate of allocation of credits and confirmation of financial contribution to the scheme.

An alternative mitigation package must be approved by the local planning authority and Natural England with evidence of allocation to the scheme.

Protected Species

The applicant should note that under the terms of the Wildlife and Countryside Act (1981) and the Conservation of Habitats and Species Regulations 2017 (as amended) it is an offence to disturb or harm any protected species including for example, breeding birds and reptiles. The protection offered to some species such as bats, extends beyond the individual animals to the places they use for shelter or resting. Please note that this consent does not override the statutory protection afforded to any such species. In the event that your proposals could potentially affect a protected species you should seek the advice of a suitably qualified and experienced ecologist and consider the need for a licence from Natural England prior to commencing works. Please see Natural England's website for further information on protected species.

Sign off by WC Ecologist will only be given once ALL outstanding information has been submitted and agreed sufficient.
