Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Under 25 square metres

Please justify the reason why biodiversity net gain does not apply:

The proposed development comprises a small-scale extension with a footprint of less than 25m² to an existing care home. The extension is located entirely within an area of existing hardstanding and gravel, which is of negligible ecological value. The site contains no trees, shrubs, hedgerows, grassland, or other habitats, and there are no ecological features within 5 metres of the works. As such, the proposal will not result in the loss or degradation of any habitat, nor will it impact protected or notable species. Given the minor scale of development, the previously disturbed nature of the site, and the absence of any biodiversity assets, the proposal does not trigger the requirement for Biodiversity Net Gain assessment and is therefore exempt under the de minimis threshold for small developments. The works are confined to the existing developed footprint and will not alter the surrounding ecological baseline.

Note: Please read the help text for further information why developments may be exempt or not in scope.
