

Supportive statement

retrospective application

for a ramp to the rear of the premises.

Coombe Down Farm Coombe Bissitt

This retrospective application has been submitted [REDACTED]

[REDACTED] The structure is a mechanical lift that is used and is needed occasionally for access to the vehicles that are too large to lift within the existing building. This lift is not used on a daily basis and is only used occasionally; however it is a necessary part for the carrying out the function of the garage business. This lift is also critical requirement for providing a service to the customers of the garage workshop.

This structure consists of two small lifting columns on a 150mm concrete base.
