

Details of planting for new hedgerow to close up existing access

Hedge to be planted with a random mix of the following species at 250mm centres in two staggered rows as shown in the diagram:

Hawthorn (<i>crataegus monogyna</i>)	35%
Blackthorn (<i>prunus spinosa</i>)	35%
Field Maple (<i>acer campestre</i>)	10%
Wayfaring Tree (<i>viburnum lantana</i>)	10%
Field Rose (<i>rosa arvensis</i>)	10%

All planting will be in accordance with the appropriate British Standard Specification. The planting will be protected with spiral rabbit guards, maintained weed free for at least 5 years and losses also within the first 5 years are to be replaced.

New hedgerow to be planted along the west boundary to stop up the existing field access to the north of the existing access, along the curtilage and behind a stock proof post and wire fence.
