

12 Hectares
29 Acres
One grid square on this plan represents one hectare.

AREAS

Area measurement is to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 8400.....parcel number
1.809ha.....area in hectares
4.47.....area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area.....
Limit of area within which individual parcels are not shown.....
To convert hectares to acres multiply by 2.47105
To convert acres to hectares multiply by 0.4047

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a reference defining the position of a point to within 10 metres proceed as follows:—

EXAMPLE:		R in River Avon	
EASTING		NORTHING	
Take west edge of 100 metres square in which point lies and read the figures opposite this line on the north or south margin	790	Take south edge of 100 metres square in which point lies and read the figures opposite this line on the east or west margin	606
Estimate tens of metres from grid line to the point	0	Estimate tens of metres from grid line to the point	1
	7900		6061
TEN METRE REFERENCE:		ST 79006061	

For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System.'
